D-Generation

An Exaltation of Larks

D-Generation: An Exaltation of Larks is an hour-long performance using the TimeSlips process to present stories from people with late stage dementia. Puppeteers play the roles of caregivers for the puppets who are residents of the care community. The play portrays the stigma, acceptance, joy and despair for people with dementia, their families, caregivers and the broader community. The performance will be followed by a facilitated discussion and sharing of community resources.

Purchase tickets for performance
and register for workshops at:
